

COVID-19 Guidelines for 2022 Season Pigeon Guillemot Survey

During the 2022 season we will still need to maintain precautions for Covid-19 despite high rates of vaccination within Washington State and relaxed guidelines. These guidelines need to be practiced at all times while participating this season. Our goal is to continue to conduct the survey while keeping ourselves and the public safe.

1. **Even if you are vaccinated, please still follow all guidelines.** Despite vaccinations people are still getting sick and we should all do our best to not spread covid needlessly.
2. **If you are sick, please stay home.** Contact your colony coordinator to arrange a substitute.
3. **If you tested positive for Covid-19 over a week ago, or been in contact with someone who has been sick please wear a kn95 or n95 mask while being in close contact with others during your survey.** If you are unsure about isolation/quarantine timelines, [please visit the CDC's isolation guidelines](#) to help you make decisions.
4. **Please follow any local or site specific covid guidelines.** If you access private property for your, please adhere to the owner's requests of appropriate PPE use.
5. **While we do not require mask wearing this season, please use your best judgment and stay safe.**
